

Fast and Simple Infrastructure Segmentation that Works Everywhere

Guardicore Centra makes segmenting your IT infrastructure fast and simple, even if you have a mix of platforms and environments. Guardicore's highly visual approach makes it easy to view your infrastructure in the context of your security and compliance needs. And with a few clicks, you can create granular segmentation rules that will reduce your attack surface.

Centra works with all of your platforms, from legacy bare-metal servers to new deployment models like containers. It lets you replace cumbersome, infrastructure-based segmentation approaches like VLANs with a simpler approach that extends to any on-premises environment or cloud provider.

Industry leaders like Deutsche Bank, Santander, and Frontier Airlines use Guardicore Centra to:

- ▶ Ring-fence their digital crown jewels.
- ▶ Simplify and accelerate compliance efforts.
- ▶ Adopt cloud and platform-as-a-service (PaaS) quickly and securely.
- ▶ Keep security in pace with fast-moving DevOps processes.
- ▶ Detect and respond to security breaches faster.
