

Simplify SecOps with FortiAnalyzer and Guardicore Centra

Reduce risk and simplify operations for your organization's IT and security teams.

Overseeing security operations has become increasingly time-consuming as today's enterprise networks and services grow in complexity and scale.

FortiAnalyzer from Fortinet helps security and IT teams overcome the challenges of juggling numerous tools and alert fatigue by combining security visibility and automation.

Through integration with Guardicore Centra, organizations can now ensure FortiAnalyzer also has access to additional segmentation — and threat detection — related data from Guardicore. This helps teams better track threat activity, assess risk, and detect potential issues or problems to reduce a breach's impact on your organization.

FortiAnalyzer's unified logging and reporting capabilities can also leverage the rich data the integration provides when generating security and compliance reports for stakeholders and auditors.

The logo for Fortinet, featuring the word "FORTINET" in a bold, white, sans-serif font with a registered trademark symbol, set against a dark purple diamond-shaped background.

Key Benefits

- ◆ **Reduce risk**
See non-compliant activity, outdated segmentation policies, or other data that enables your organization to reduce risk.
- ◆ **Simplify operations**
See alerts and potential issues in a centralized location for quick follow up.
- ◆ **Increase value**
Leverage Guardicore-generated data, such as audit logs in FortiAnalyzer reports.

The average total cost of a data breach has increased by 10% since 2014.¹

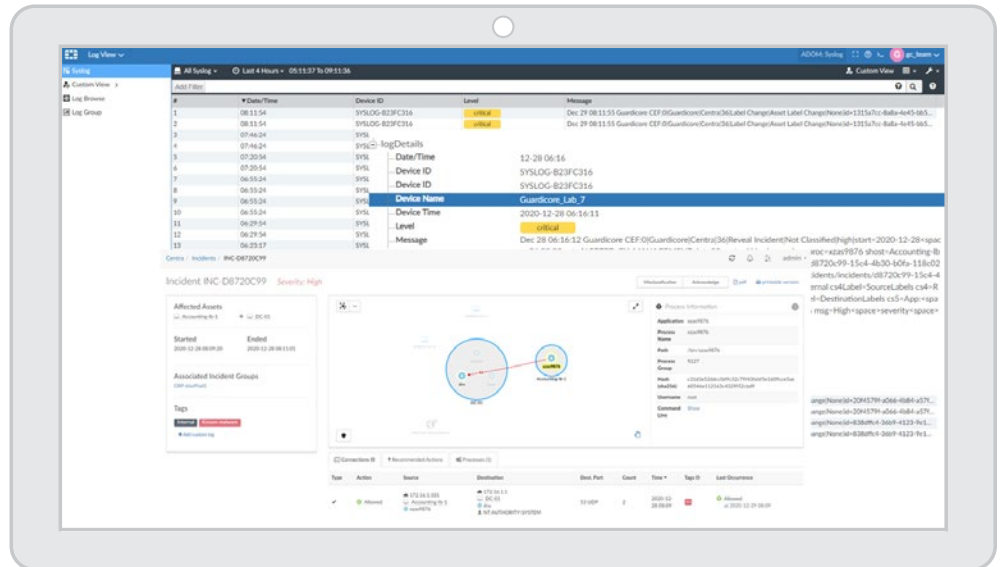

¹ "2020 Cost of a Data Breach Study," Ponemon Institute and IBM Security, 2020.

Enterprise-class security for your data center with FortiAnalyzer and Guardicore

Give your IT and security teams further insight into areas such as detected threats, non-compliant activity, or segmentation policy enforcement, alongside your other projects, in FortiAnalyzer, allowing you to reduce risk and simplify security operations.

Through the integration, FortiAnalyzer can ingest data from Guardicore through Syslog, and the following can be exported to Fortianalyzer:

- ◆ Incidents
- ◆ System alerts
- ◆ Agent logs
- ◆ Audit logs
- ◆ Label changes log

Visibility and protection across any complex environment:

About Guardicore

Guardicore is the segmentation company disrupting the legacy firewall market. Our software-only approach is decoupled from the physical network, providing a faster alternative to firewalls. Built for the agile enterprise, Guardicore offers greater security and visibility in the cloud, data-center, and endpoint. For more information, visit www.guardicore.com or follow us on Twitter or LinkedIn.
